SUMMARY

Experienced Full Stack Developer with a strong track record in transitioning services to modern web platforms and optimizing functionality for improved user experience. Proficient in core **PHP**, **Laravel**, **Bootstrap**, **Node.js**, **React**, and **Next.js**, with key projects including a virtual phone line site and **AI tool** integration for the RehanLab website. I lead backend operations, manage **SIP server** monitoring, handle platform and landing page updates (**Next.js**), and oversee deployments across multiple servers. Effective communicator, delivering tutorials and live sessions to enhance user understanding and engagement.

- Html, CSS, JavaScript
- Bootstrap
- MySQL
- Laravel
- Php
- Linux
- React
- Next.js
- Node.js
- Deployment
- Firebase
- GIT

EDUCATION

Aptech Learning	2022 - 2025
Advanced Diploma In Software Engineering (ADSE)	
C.A.S College For Advanced Studies	2021
Intermidate	

PROFESSIONAL EXPERIENCE

DIDx inc

Dec 2023 - Present

Full Stack Developer

As a Full Stack Developer, I manage and maintain core infrastructure across multiple servers, each hosting independent modules for the admin panel **PHP**, old customer panel **PHP**, and new customer panel **Node.js backend**. I oversee full-stack development and deployment, ensuring seamless updates and resolving issues across all panels. My responsibilities include monitoring admin and customer server logs, updating admin features like reporting modules, resolving customer panel issues, and optimizing the **Next.js** based landing page for better performance.

I also collaborate with cross-functional teams to gather requirements and implement new features in both backend and frontend layers. My work ensures platform-wide stability, performance, and a consistent user experience across all touchpoints.

Rehan Foundation

July 2023 - Nov 2023

Junior Developer

I transitioned a social media incubator from Excel to a web-based platform using core **PHP**, optimizing TalkTube for seamless user and admin functionality. I initiated the development of a virtual phone line site with a **Figma-designed UI** and **Bootstrap/Laravel** frontend, though progress was paused. Additionally, I created and deployed **AI tools** for RehanLab, developed instructional videos, and conducted live sessions to enhance learning.

Diamond Metal

Feb 2022 - May 2023

Lab Incharge

In my role, I managed comprehensive lab maintenance, including equipment, facilities, and detailed test records. I conducted metallurgical tests with precision, ensuring reliable results, while maintaining equipment calibration for optimal performance. I also enforced strict safety protocols to ensure a secure working environment.

PROJECTS

[www.vorker.co](#)

Vorker

Vorker is an HR platform built using core **PHP** for both frontend and backend. It offers dynamic training and partner videos for users and students. After watching the training videos, users can attempt MCQs, and upon passing, instantly receive a downloadable certificate.

Hotel Management System

[hms-virid.vercel.app](#)

Hotel Management System is a **MERN-based** platform that allows users to reserve rooms and submit feedback. It supports role-based access, enabling administrators and staff to manage room reservations and update cleaning statuses. The system ensures an interactive experience for users while giving admins full control over operations and user management.
